FACT SHEET

TITLE OF SHOW: "Dragonfly TV" (Year 9)

DESCRIPTION: "Dragonfly TV" features real kids doing real science, demonstrating practical applications of math and other scientific disciplines. Series is E/I rated and is suitable for family viewing.

DISTRIBUTED BY: Telco Productions, Inc.

PREMIERE DATE: Week of September 4, 2017

LENGTH: 28:30

BARTER SPLIT: 3 ½ Minutes Local / 3 ½ Minutes National

FEEDS: Weekly PitchBlue (MPEG4) feeds

PROMOS: Promos contained within each episode

FORMAT: 4 Segments / 3 Commercial Breaks

Show is closed captioned according to FCC rule 79.1(j)(2) and has the E/I icon present throughout the broadcast; E/I age range is 13-16 years old. Barter spots are CALM Act compliant

DRAGONFLY TV

“Dragonfly TV” is a weekly half-hour science television series that meets the educational and informational objectives of the FCC’s Childrens Programming requirements for children ages 13-16. The programs highlight children “doing” projects with real hands-on experience and demonstrates practical applications of mathematics and science. It introduces young viewers to a variety of scientific disciplines and challenges them in critical thinking and problem solving skills, while providing valuable information to reach answers. Each episode is engaging, entertaining and educational in structure, allowing children to investigate science on their own. “Dragonfly TV” is closed-captioned for the hearing impaired and displays the “E/I” icon throughout the broadcast.

RE: Dragonfly TV

Dear Alex,

I have reviewed the series "Dragonfly TV" and I believe it's educational and informational value meets FCC requirements for children's programming aged 13-16 years. As a teaching Professor of Electrical Engineering at UCLA, I consider this extraordinary television series vital to enhancing the interest of science among our youth and applaud those television stations that broadcast it. The series engages young viewers with various scientific projects and provides a variety of information from multiple scientific fields. An example of this is in episode D-105, when youngsters experiment with designing their own model rockets, noting how various shapes, materials and engines affect performance. Another example is in episode D-114, where kids investigate why there are so many boulders present in white water rapids and how they affect the water's speed and direction.

This series' educational contribution to youngsters impresses me, and since there are virtually no science programs on television today, "Dragonfly TV" fills a much needed void.

Sincerely yours,

Bahram Jalali

RE: Dragonfly TV

Dear Alex,

I believe the television series "Dragonfly TV" meets the FCC's educational and informational requirements for children's programming aged 13-16 years. The series is a wonderful example of how television can extend the science knowledge of young viewers. The various scientific experiments and investigations featured on the shows enable young people to gain an appreciation for science in a unique and entertaining way. "Dragonfly TV" not only promotes interest in the various science fields, but also allows young viewers to think critically about different problems and search for solutions. For example, in episode D-109, kids investigate eco-systems and how changes in the environment affect salmon populations. In episode D-103, youngsters invent a "wobble meter" to investigate balance, learning how and why a pole can help a tight rope walker keep from falling.

I wholeheartedly endorse this series and feel the educational and informational value more than meets the standards set forth by the FCC.

Sincerely,

Diane C. Perlov, Ph.D.
Senior Vice President, Exhibits
California Science Center
