

Dear Station,

Pursuant to the Children's Television Act of 1990, "SPORTS LAB" will satisfy the FCC Children's programming requirement and can be classified as either core or non-core programming. "SPORTS LAB" serves the educational and informational needs of children 13 to 16 years of age with its program content, including the importance of understanding the science behind various sports. The series examines many different sports and explores what are the scientific parameters of each individual sporting activity.

"SPORTS LAB" as delivered is formatted to allow for no more than 14 minutes of total commercial time per broadcast hour (7 minutes per half-hour). "SPORTS LAB" does not display any Internet web site address or host selling during or adjacent to the program, and is otherwise in compliance with Sections 73.670(a) through (d) of the Commission's Rules.

To facilitate your FCC filings, episode synopses are available on line at our website, [www.telcoproductions.com](http://www.telcoproductions.com). Also available on-line are testimonials from our educational advisory review board, consisting of educators and other professionals who have reviewed the series (see the following letters for details).

If you have any other questions, please don't hesitate to contact us.

Sincerely,

A handwritten signature in black ink that reads "Alex Paen".

Dear Alex,

I have reviewed several episodes of the program "SPORTS LAB" and I am confident that it meets the educational and informational needs of children 13 to 16 years of age with its program content. Each episode in the series features two different sports and offers teen viewers important information on the science of these sports. Whether explaining the scientific gyrations of a thrown baseball or why a certain swim stroke is more efficient, each episode breaks down the science behind the sport. The programs examine a wide variety of sporting activities, from snowboarding to cricket—with each sport de-constructed to explain the science behind the physical movements of the participants as well as the instruments they use in that sport.

"SPORTS LAB" is an important addition to any broadcast stations' programming line-up because the series informs and educates young viewers, while using science to broaden their understanding of many diverse sports.

Sincerely,

A handwritten signature in blue ink, appearing to read "Brian A. Peña".
